DIAMOND SANDING / POLISH WHEELS

These **DIAMOND SANDING / POLISHING WHEELS**, also known as diamond soft wheels, are made by bonding a layer of diamonds and resin to the perimeters of a foam backed wheel on a nylon core. The diamonds are securely held in place for many hours of sanding and polishing.

The **Reentel RESIN DIAMOND WHEELS** are constructed of nylon cores. An economical priced diamond flex wheel for the occasional lapidarist. These wheels need to be broken in! These are the identical wheels used on the Cabking.

* - Special Order Item

The **EASTWIND FLEX WHEELS** are constructed of nylon cores and use an unique resin system to bond the diamonds to the wheel. These wheels produce a less aggressive sanding action than some flex wheels on the market. A favorite with OPAL cutters. These wheels need to be broken in! Made in the U.S.A.

The **Diamond Pacific NOVA** wheels are the "GOLD" standard of flex wheels in the industry. They are the longest lasting flex wheel made. These wheels need break-in. Made in the U.S.A. These are the identical wheels used on the Pixie, Genie and Titan.

SINTERED RIM DIAMOND WHEELS

WHEEL DIAMETER X THICKNESS X ARBOR HOLE	Diamond Mesh Size	MLS PART No.	Price

SINTERED DIAMOND WHEEL

The **BEST** Diamond Grinding Wheel on the MARKET!!! Constructed of a solid metal core with a 3.5 mm layer of DIAMOND/METAL Matrix around the perimeter of the wheel. With proper care this wheel will cut as fast for its' entire life as when it is fresh out of the box. This style wheel has a **MUCH** extended life (better than 20 times) of a rim plated wheel.
